Dear Cosmology Books Group members,  
Here are some interesting links etc. on subjects that come up in our Ch. 11-14 of Kip Thorne's Black Holes and Time Warps book:

Good presentation on how 'space and time "flip" inside the event horizon:

Cosmic Censorship:

1. Consult Wikipedia about Cosmic Censorship
2. Suggest strongly to revisit Kip Thorne's book, "The Science of Interstellar" that came out in 2014, especially for the description of the Cauchy (inner) horizon inside the event horizon of a black hole as this relates to the "Strong version of Cosmic Censorship.

Clear article at a good level for our group in Quanta Magazine (highly recommended magazine) on the Disproof of the Strong Cosmic Censorship Hypothesis (note, you might want to consult Wikipedia on Cosmic Censorship first if needed):

Hope these are of interest to some of you... Susan and I found those useful for us.
